

DevOps Engineer for Voxx

Deutsche Telekom Pan-Net s.r.o.

Job ID:	88491
Country:	Greece
Location:	Athens
Region:	Attica
Employment Type:	Full Time - Regular
Job Level:	Professional
Languages Required:	English
Experience Required:	3-5 years

Job Description

Tasks:

- Engage in and improve the whole lifecycle of infrastructure and services—from inception and design, through deployment, operation and refinement.
- Support infrastructure and services before they go live through activities such as system design consulting, developing software platforms and frameworks, capacity planning and launch reviews.
- Maintain Infrastructure and services once they are live by measuring and monitoring availability, latency and overall system health.
- Support incident resolution and work on lesson learned and preventive maintenance (HW/SW)
- Analyze continuously process and performance - Proactive Problem Management
- Engage in continuous integration, continuous deployment and continuous testing of infrastructure and services.
- Ensure infrastructure and/or application availability and continuously optimize resource usage.
- Scale systems sustainably through mechanisms like automation and evolve systems by pushing for changes that improve reliability and velocity.
- Practice sustainable incident response and blameless postmortems.
- Prepare and continuously improve technical documentation
