Job Description

CloudBilling is a first billing as a service product developed by T-Systems. It offers different business models to have a complete billing solution, in the cloud, divided only virtually. We handle business platform billing events and transform them in to billing oriented products that can be later rated and charged-billed. Our billing solution is based on open source components and running on cloud platforms. We use micro services architecture, where it is applicable. Basic functionality of a product is enhanced depending on customer demands, despite we do a product. Development process is Scrum. The team is located in Saint-Petersburg and Germany (Aachen). Our customers are in automotive, satellite, transport, telecommunication and airport areas.

Responsibilities:

- Automating the development cycle of the application
- Maintenance and improvement of development infrastructure
- Build up and support production infrastructure
- Close work with development/test teams

Job requirements

Requirements:

- Experience in administering RHEL / CentOS or other *nix OS
- Knowledge of scripting language (shell, Python, etc.)
- Experience in setting up CI (Jenkins) and build systems (Maven)
- Experience with Git, Docker, Nginx, Nexus / Artifactory
- Experience with configuration management tools: Ansible
- Technical English (spoken/written).

Nice to have:

- Knowledge in monitoring and alerting area (Prometheus, Grafana, ELK)
- Experience with MySQL, MongoDB, Apache Kafka
- Experience with container orchestration platforms (Rancher, Kubernetes, Nomad)
- Experience with public cloud platforms (AWS, GCloud).
